

# Test Case

**Project Name:** TraViz

**Test Case ID:** Recommendation-Invalid

**Test Priority (Low/Medium/High):** Medium

**Module Name:** rec.html

**Test Title:** Recommendations – Invalid Location Input

**Test Designed by:** Gopika Krishnan

**Test Designed date:** 25 November 2021

**Test Executed by:** 1 December 2021

**Test Execution date:** 30 November 2021

**Description:** This tests whether the recommendation function of the system can handle user-input related errors. If the user enters a location that does not exist, the system should be able to detect it and let the user know that the location they entered is wrong.

**Objective:** : Verify whether the system can handle errors in user input (when they enter an invalid location) when they use the 'Recommendations' feature.

**Pre-conditions:** Website should be loaded properly on the user's browser of choice

Step	Test Steps	Test Data	Expected Result	Actual Result	Status (Pass/Fail)	Notes
1	User navigates to 'Recommendations' page in header	Click on 'Recommendations' in header	Navigate to 'Recommendations' page of Website	Navigated to 'Recommendations' page of Website	Pass	

				and it is loaded properly		
2	User inputs location in the available field	invalidLocation	User can input the location	User is able to enter their location	Pass	Refer to Recommendation-Valid when the user inputs valid location
4	User clicks on 'Recommend' button	Click on 'Recommend' button	Popup button is shown to user informing them of erroneous input	Popup button shows up saying – "Looks like your location input is invalid. Sorry!"	Pass	
5	User clicks on 'OK'	Click on 'OK' in popup window	Popup window is closed	Popup window is closed	Pass
